# LUXAFLEX® *Duette® Architella* SHADES

---

## OUR MOST ENERGY EFFICIENT SHADES

The exclusive LUXAFLEX® Duette® Architella Shades feature a patented honeycomb-within-a-honeycomb construction for superior insulation, reducing heat loss in winter and keeping the home cooler in summer.

The Luxaflex Duette Architella Shades Collection offers 5 fabric ranges – Ménage, Verve, Aurora, Elan and Panache. The colour palettes range from neutral and earthen tones to bold colours and warm hues and there are various textures available.

The Duette Architella Range is exclusive to Luxaflex Window Fashions and the Panache Range is available in the Classic Series, with Ménage and selected 20mm Architella Fabrics exclusive to the Designer Series limiting it to distribution via Luxaflex Window Fashions Galleries and David Jones.

in beautiful comfort  
with Duette Architella  
Shades.*

## MÉNAGE

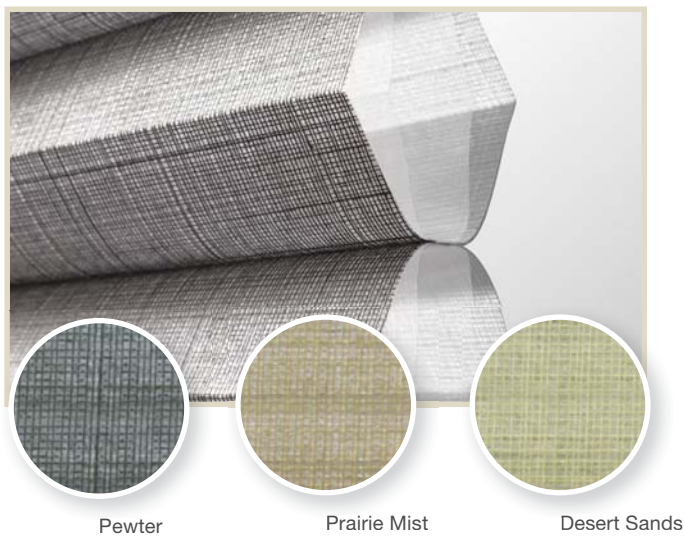

From the creators of Duette Shades and Duette Architella Shades comes the latest innovation – Duette Architella Ménage. This revolutionary fabric range provides even greater energy efficiency in any home with an additional inner cell elevating the insulating properties by way of the cell-within-a-cell-within-a-cell design. Architella Ménage Fabric effectively delivers a triple honeycomb construction with six layers of fabric and five insulating air pockets.

Architella Ménage Fabric provides unrivalled energy efficiency with the Elan Fabric design in three appealing colours in both translucent and blackout opacities.

## VERVE

Made from 25% recycled materials, Architella Verve Fabric offers urban chic with an eco-friendly quality. The irregular texture is enhanced with a subtle reflectivity in natural hues that reveal iridescent shine in natural light. The tonal colour palette of Verve Fabric is available in translucent opacity.

## AURORA

Aurora Fabric with IllumaCell, the revolutionary clear inner cell, offers a subtle woven linen weave, filtering more light to illuminate the texture and lustre of the fabric. Featuring a subtle earthen toned colour palette in a translucent opacity.

Note: Colours are as accurate as the printing process allows

Volcanic Ash

Truffle

Platinum

Linen

Daisy White

Journal

Milk Chocolate

Graphite

Black Onyx

## ELAN

Elan Fabric is a refined shimmering and luminous fabric range with a linen texture. The modern colour palette includes bold colours and warm hues. With a colour to suit any decor, all Elan Fabric colours are available in translucent opacity, with selected colours available in the matching blockout opacity.

Oregano

Autumn Harvest

Toasted Almond

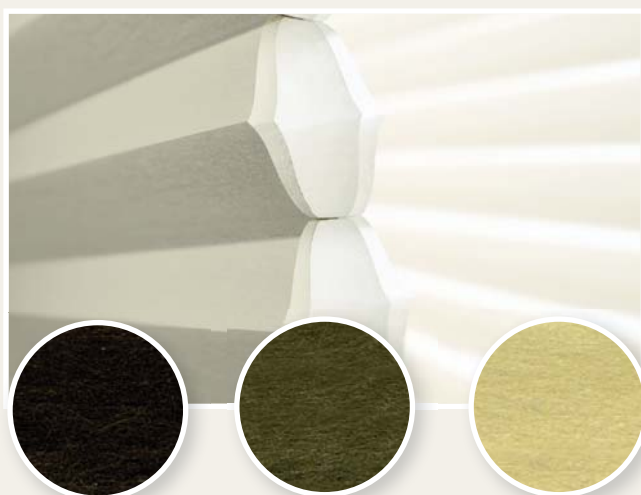

Desert Sands

Pearl Grey

Patina Grey

Frosted Mulberry

Dark Chocolate

Weathered Bronze

Beach Shells

Daisy White

Linen

Suede

Wild Ginger

## PANACHE

Panache Fabric offers a subtle, swirling look with a soft texture and smooth finish. The colour palette is heavily neutral with splashes of earthen tones. All Panache Fabric colours are available in matching translucent and blockout opacities.

# ARCHITELLA *Cell Construction*

The Duette Architella Collection features the patented cell within-a-cell construction providing superior energy efficiency.

## Architella Fabrics

## Architella Ménage

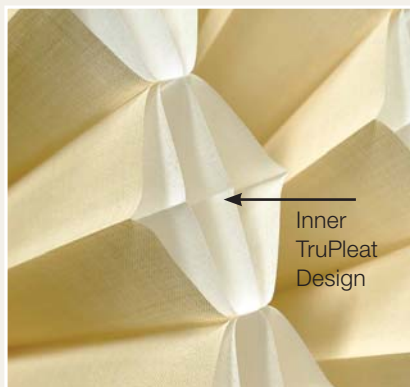

### Air Pockets

Duette Architella Fabric has three or five distinct air pockets for superior energy efficiency and increased insulation.

### Vibrant Colours

The multiple layers of fabric in Duette Architella Shades preserve the fabric colours and textures in bright sunlight and in opaque fabrics.

### Consistent Beauty

For more uniform appearance, the inner TruPleat Construction of Duette Architella Shades, keeps every shade consistent from front to back and top to bottom.

### IllumaCell

The revolutionary IllumaCell allows light to filter through the Aurora Fabric and enhance the texture and illuminate the fabric from the back and top to bottom.

# ARCHITELLA *Operating Systems & Design Options*

---

Duette Architella Shades are available with a selection of easy-to-use operating systems that have been designed with innovation and child safety in mind. There is also a choice of speciality shapes and design options for more flexibility.

## REDUCE YOUR HEATING COSTS BY UP TO 49%<sup>^</sup> WITH DUETTE ARCHITELLA MÉNAGE SHADES.

Above: The Architella covered window on the right demonstrates significantly improved energy savings versus the uncovered window on the left.

Windows can make up 10% of a home's insulated shell. Did you know that up to 30%# of the unwanted heat loss in winter and heat gain in summer occurs through uncovered windows?

In summer, Duette Architella Shades filter unwanted glare while deflecting heat, keeping your room cooler. In winter, Duette Architella Shades reduce heat loss, keeping your room warmer.

## DUETTE ARCHITELLA SHADES R-VALUES.

A product's "R-value" is a measurement of its ability to resist heat flow. In a home during winter, R-values indicate the ability of walls, roofs and windows to keep the heat inside. The higher its R-value, the more insulation a product provides. A fully-recessed, reveal-mounted Duette Architella Ménage Shade can increase the R-value of a 3mm single glazed window from 0.127 to 0.979, reducing the heat transfer through that window by 87%. Independent modelling has shown that this in turn can reduce an average home's heating costs by up to 49%<sup>^</sup>.

R - Value**	0.10	0.20	0.30	0.40	0.50	0.60	0.70	0.80	0.90	1.00
DUETTE Architella Ménage 38mm Opaque									0.979	
DUETTE Architella Ménage 38mm Translucent							0.780			
DUETTE Architella 20mm Opaque							0.775			
DUETTE Architella 20mm Translucent					0.611					
DUETTE 20mm Midnight				0.521						
DUETTE 10mm Nightfall			0.454							
DUETTE 20mm Symphony			0.419							
DUETTE 10mm Classic		0.313								
DUETTE 20mm Sheer	0.166									
3mm Cl Glass	0.127									

\*\* The R-values are the combined measurement of 3mm (one-eighth inch) Cl glass (R=0.127) plus the window covering and are reported in metric SI units. Thermal properties are determined by a certified third party laboratory utilising accepted ASTM, NFRC and WES standards and procedures. Measurements may vary based on window type and method of installation.

<sup>^</sup> Savings are based on the installation of fully-recessed, reveal-mounted Luxaflex DUETTE® Architella Ménage 38mm Blockout Shades in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on the window type and installation.

# Based on information from NABERS (National Australian Built Environment Rating System). Visit [www.nabers.com.au](http://www.nabers.com.au) for more information.
